The famous
Macy's Christmas Tree
in Chicago.

Just a few of our happy customers. Join them today!

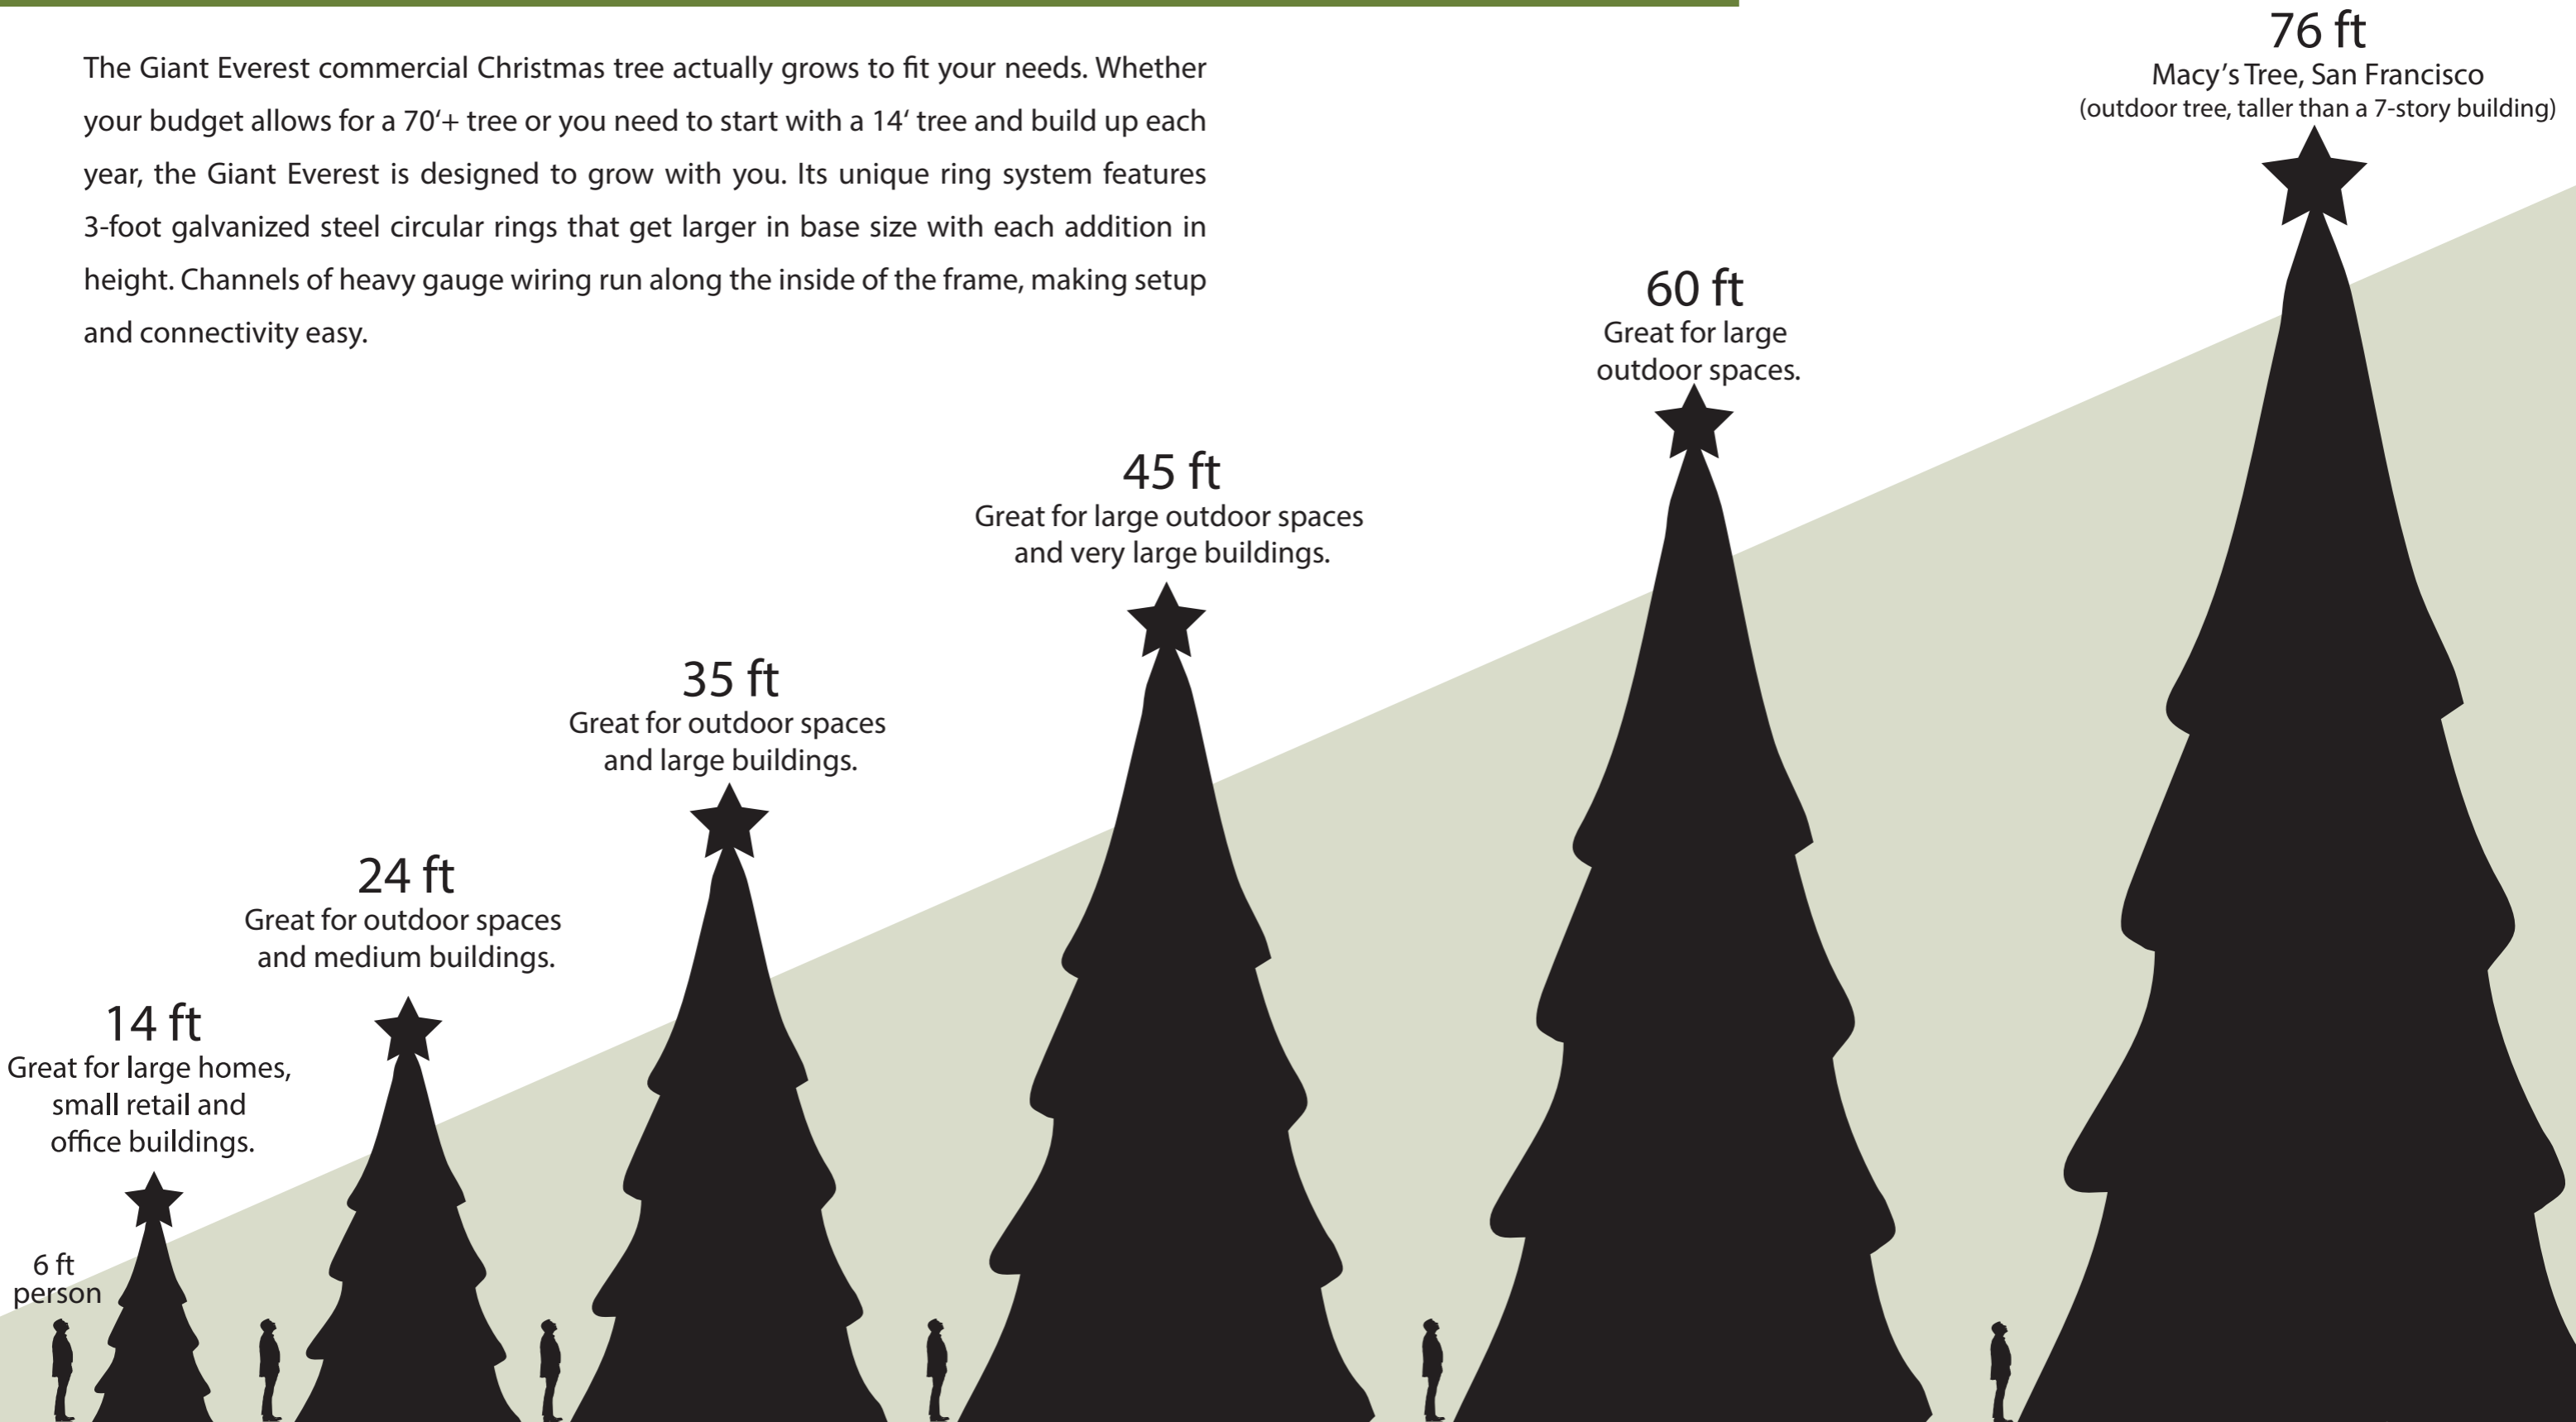

“...it drew large crowds...it’s a wonderful addition to the community.”

-City of Birmingham, MI

Tree Heights from 14 ft to over 70 ft

Featuring stackable galvanized steel rings, which means you can grow your tree year over year.

The Giant Everest commercial Christmas tree actually grows to fit your needs. Whether your budget allows for a 70'+ tree or you need to start with a 14' tree and build up each year, the Giant Everest is designed to grow with you. Its unique ring system features 3-foot galvanized steel circular rings that get larger in base size with each addition in height. Channels of heavy gauge wiring run along the inside of the frame, making setup and connectivity easy.

Lighting Options

A variety of light colors and styles gives you the ability to customize your Christmas tree display. Incandescent lights are a traditional favorite, or choose energy efficient and vibrant Wintergreen Lighting LEDs. Popular colors such as clear and multicolor are available, as well as the option to create custom color combinations, which means you can create your own color themes. The lights come pre-wired to the branches, which makes the assembly, dismantle and storage process very efficient.

Clear Mini Lights

Clear or Multicolor C7 Incandescent

Clear or Multicolor Wide Angle Mini LED

Clear or Multicolor C7 LED

Any Custom Color Combinations

“it has become an icon
for the event”

-Cincinnati Zoo & Botanical Gardens

Lush Thick Foliage

The Giant Everest Tree is known for its lush and natural appearance. The needles are made of .20mm PVC making it 60% thicker than average commercial trees. The PVC needles are crush resistant, allowing for safe storage, which will ensure your tree looks fresh year after year. All trees are UV protected, and are fade and flame resistant. Generous foliage tip counts give the Giant Everest a realistic, full appearance like a freshly cut tree. Whether you need a 14' tree or a 70' tree, your foliage will look beautiful from top to bottom making the perfect canvas for your lights, ornaments and decor.

Construction & Affordability

Red Sleigh Giant Everest Trees are designed to be budget friendly, simple to construct and built to withstand the rigors of the outdoors year after year.

The tree structure is built using stackable 3-foot galvanized steel circular rings that scale in diameter as they build up from the base. Using 3-foot stacking rings allows customers to purchase a smaller

height tree and then add additional height from the base as needed.

Channels of heavy gauge wiring with Cooper sockets run along the inside of the frame allowing for easy setup and connectivity. Once connected, simply plug the tree into a power source and you are ready to go for hours of viewing enjoyment by all.

Set-up & Storage

Giant Everest Trees are sturdy enough to climb on during assembly and include hook branches designed to settle securely into pre-made slots throughout the entire frame.

Tree frames are marked with color coding and universally-sized bolts to connect the frame together.

The tree is easy to disassemble and because the branches are prelit it means you don't have the hassle of unwiring the entire tree. The frame's stacking rings are also specifically designed to fit inside one another so the amount of storage space required is actually very minimal.

Giant Everest trees are engineered for indoor or outdoor use, which makes them ideal for sharing the magic of Christmas. Outdoor trees are great for public viewing, lighting ceremonies and picture taking.

“...we have received so many calls from Village residents expressing how terrific the new tree looks...”

-Village of Glen Ellyn

About Red Sleigh

Red Sleigh is the industry's leading supplier of premium residential and commercial Christmas trees, greenery and decor. The commercial line of trees features the Sequoia and the iconic Giant Everest. The Sequoia is a beautiful tree that ranges in size from 6.5 feet to 14 feet, making it the ideal commercial tree for smaller spaces. The Giant Everest line of ring trees is one of the most popular giant trees available for commercial venues and is stocked in heights from 14 to 41 feet, with additional heights available up 70+ feet upon request. Accompanying our tree selection is the Red Sleigh Greenery Collection which includes matching designer trees, wreaths and garland. Red Sleigh products are popular because our exacting design and production requirements make them the best in their class so customers like you can create a truly amazing experience!
